Parasitic nematodes are tiny worm-like creatures that feed on plant roots and are a common problem in garden soils. Parasitic nematodes cause stunted or knotted root systems and weak plant growth. If nematodes are known to be present in your garden then apply eco-nemguard® during and after planting. eco-nemguard is an effective organic treatment which suppresses nematode numbers and allows plants to develop healthy roots. If the soil is dry water well prior to application. Control of nematodes may be reduced in prolonged dry periods so additional watering is recommended.

PRECAUTION: Keep animals away from treated areas until the eco-nemguard granules are watered in.

CAUTION: PROTECTION OF WILDLIFE FISH, CRUSTACEA AND ENVIRONMENT. Toxic to aquatic life. Do not contaminate wetlands or watercourses with this product or used containers.

STORAGE AND DISPOSAL: Store in the closed, original container in a cool dry storage area away from children and pets. Do not store in direct sunlight. Protect from frost. If recycling, rinse empty container and apply rinsate to the base of treated plants. Replace cap and dispose of the empty container by placing in recycling bin in compliance to local, state or territory government regulations. If not recycling, dispose of empty container by wrapping in paper, placing in plastic bag and putting in garbage.

SAFETY DIRECTIONS: May irritate the eyes and skin. Avoid contact with eyes and skin. Avoid inhaling dust. When using the product wear safety glasses. If product in eyes, wash it out immediately with water. Wash hands after use.

FIRST AID INSTRUCTIONS: If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 131126; New Zealand 0800 764 766.

FIRST AID WARNINGS: Irritant to skin, eye, mucous membranes and upper respiratory tract. May cause allergy.

eco-nemguard® organic* nematicide HOW TO USE

DO NOT use on soil with high silt content.
DO NOT allow the granules to become wet or damp before or during application.
DO NOT apply product to crops through broadcast granule spreading equipment.
DO NOT apply over the top of mulch.

CROP	PEST	RATE	CRITICAL COMMENTS
Vegetables	Parasitic nematodes living freely in the soil	2 g/ 1 m ² (6 shakes)	Ensure soil is moist before application. Apply to affected area or when sowing vegetable seeds, newly emerged seedlings and new transplants. Sprinkle granules evenly over planting area and mix into soil. Thoroughly water in afterwards. If dry conditions persist, additional regular watering should be applied.

NOT TO BE USED FOR ANY PURPOSE OR IN ANY MANNER CONTRARY TO THIS LABEL UNLESS AUTHORISED

Withholding Period (WHP): NOT REQUIRED WHEN USED AS DIRECTED
