Slasher Organic Weedkiller

Active Constituent: 0.25 g/l. Nonanoic Acid

For use in the control of seedling and young broadleaf and grass weeds, for suppression of established weeds and perennial species, and for control of moss and algae as per the directions for use.

For non-selective control of seedling and young broadleaf and grass weeds, for suppression of established weeds and perennial species, and for control of moss and algae. Visible results within hours after spraying.

Apply by ground equipment only using for example boom or spot sprayer. Partial coverage will give only partial control. NO LASTING RESIDUES

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND SUSCEPTIBLE PLANTS/CROPS, CROPPING LANDS OR PASTURES.

PRECAUTIONS:

Wear eye protection when mixing or using. Do not enter treated areas until the product has dried. DO NOT spray porous surfaces without prior testing. May cause discolouration on porous hard surfaces.

SAFETY DIRECTIONS:

Store in the closed, original container. DO NOT allow spray to contact or drift onto plants you do not want killed. DO NOT apply if heavy rains or storms that are likely to cause runoff from soil are forecast within 3 days of application. DO NOT water treated area for 24 hours to achieve maximum results. DO NOT apply if rainfall is expected before spray deposits dry on plant surfaces. DO NOT spray if weeds are wet.

STORAGE AND DISPOSAL:

Not approved under USDA-NOP Certification. Due to a failure to strictly follow label directions. OCP will not be liable for any loss or damage due to a failure to strictly follow label directions. Additional information is listed in the Safety Data Sheet (SDS).

ENVIRONMENT:

Will irritate the eyes and skin. Repeated exposure may cause allergic disorders. Avoid contact with the skin. If in eyes, hold eyes open, flood with water for at least 15 minutes and see a doctor. If swallowed, do NOT induce vomiting. Call a doctor or Information Centre. Phone Australia 131126. If aspirated, contact a doctor or Information Centre. Phone Australia 131126. If on skin, immediately wash area with soap and water. If product on skin, immediately wash area with soap and water. Local government and state or territory government regulations. Do not burn empty containers or product. If an approved waste management facility is not available from the supplier. Use wash gloves, face shield or goggles, and contaminated clothing. If product or spray in eyes, wash it out immediately with water. Wash hands after use. After use, discard container in the Safety Data Sheet (SDS).

MIXING:

Half fill spray tank and commence agitation. Slowly add required amount of Slasher Organic* Weedkiller. Top up to fill tank. Ensure that all weed foliage is totally covered with the product. Spray to completely cover plant surface. For driveways or heavy spraying situations, apply on each side of the crop row taking care not to allow spray to contact any of the crop foliage. For Spot Spraying in Lawns and Turf Gardens, Amenity horticulture areas, and perennial weeds in Protected cropping situations apply on each side of the crop row taking care not to allow spray to contact any of the crop foliage. Reapplication at around 7 days may be necessary if regrowth occurs. This product may damage lawn or coverage will result in partial control. This product controls many weed species and is non-selective. Pelargonic acid (nonanoic acid) occurs naturally in plants including geraniums. It acts on the leaf cell membrane and causes the foliage to die or desiccate. Pelargonic acid contains 2 pentadien-1-yl-carboxylic acid.

Additional information is listed in the Safety Data Sheet (SDS).

STATEMENT OF COMPLIANCE:

This product is a low-risk herbicide. The label complies with a Low Risk Chemical Regulation. This product is classified as low risk, meaning it is less harmful to human health and the environment compared to conventional herbicides. The product is designed to be used in a manner that minimizes the risk to exposed people and the environment.

APPLICATION:

Spray to completely cover plant surface. Desiccation usually occurs within hours of application. The product may damage sensitive adjacent ornamental plants. This product contains 2 pentadien-1-yl-carboxylic acid.

DO NOT water treated area for 24 hours to achieve maximum results.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

Slasher Organic* Weedkiller is a natural plant desiccant and weed killer. The active ingredient is pelargonic acid, which occurs naturally in plants including geraniums. It acts on the leaf cell membrane and causes the foliage to die or desiccate. Pelargonic acid contains 2 pentadien-1-yl-carboxylic acid.

For non-selective control of seedling and young broadleaf and grass weeds, for suppression of established weeds and perennial species, and for control of moss and algae. Visible results within hours after spraying.

FOR NON-SELECTIVE CONTROL OF SEEDLING AND YOUNG BROADLEAF AND GRASS WEEDS, FOR SUPPRESSION OF ESTABLISHED WEEDS AND PERENNIAL SPECIES AND FOR CONTROL OF MOSS AND ALGAE AS PER THE DIRECTIONS FOR USE.
